

Michigan Social Districts

Villages, Townships, and Cities with a Social District as of December 2021

Notes: A social district is a specially designated, public common area in which the consumption of alcohol off liquor licensee premises is permitted. Social districts must be designated as such by the local governing body. Licensees who wish to participate must obtain permission from their local government and then apply for a state social district permit. See MCL 436.1551 for more information.

Social districts were created to encourage business during the COVID-19 pandemic. They allow licensees to serve more customers despite social distancing restrictions and encourage visitors to explore the social district area.

See the attached Michigan Social Districts - Reference Table for a complete list of social districts.

Michigan Social Districts - Reference Table
