

# Michigan Bicyclist Traffic Crash Fatality Data

Data includes calendar years 2012 through 2022

Total vehicle miles traveled (orange line) have remained flat while traffic crashes involving bicyclists have declined (green line).

Since 2012, there are fewer bicyclist-related crashes per mile driven (red line) but bicyclist traffic crashes have gotten more deadly as the fatality rate for crashes involving bicyclists has increased substantially (purple line).
