

Michigan Primary Energy Consumption by Energy Source Type

Estimates from 1960-2021*, trillion BTU

Fossil Fuel Sources

Non-Fossil Sources

Source: United States Energy Information Administration, State Energy Data System - Michigan Report
SFA Contact: Alex Krabill, Legislative Analyst

*Note: 2022 data was not included due to calculation changes made to United States Energy Information Administration, State Energy Data System reports for primary energy consumption of electricity generation from non-fossil renewable energy sources that makes it difficult to compare across time periods.
