

**STUDY OF MICHIGAN PUBLIC UNIVERSITY
ENROLLMENT PATTERNS**

BY COUNTY AND INSTITUTION

October 2009

THE SENATE FISCAL AGENCY

The Senate Fiscal Agency is governed by a board of five members, including the majority and minority leaders of the Senate, the Chairperson of the Appropriations Committee of the Senate, and two other members of the Appropriations Committee of the Senate appointed by the Chairperson of the Appropriations Committee with the concurrence of the Majority Leader of the Senate, one from the minority party.

The purpose of the Agency, as defined by statute, is to be of service to the Senate Appropriations Committee and other members of the Senate. In accordance with this charge the Agency strives to achieve the following objectives:

1. To provide technical, analytical, and preparatory support for all appropriations bills.
2. To provide written analyses of all Senate bills, House bills and Administrative Rules considered by the Senate.
3. To review and evaluate proposed and existing State programs and services.
4. To provide economic and revenue analysis and forecasting.
5. To review and evaluate the impact of Federal budget decisions on the State.
6. To review and evaluate State issuance of long-term and short-term debt.
7. To review and evaluate the State's compliance with constitutional and statutory fiscal requirements.
8. To prepare special reports on fiscal issues as they arise and at the request of members of the Senate.

The Agency is located on the 8th floor of the Victor Office Center. The Agency is an equal opportunity employer.

Gary S. Olson, Director
Senate Fiscal Agency

ACKNOWLEDGEMENTS

This report was prepared under the direction of Senate Fiscal Agency Deputy Director Ellen Jeffries. Senate Fiscal Agency Intern Jessica Clark gathered the data, prepared the tables and maps, and summarized the information. Ms. Clark is a graduate student at the Gerald R. Ford School of Public Policy at the University of Michigan-Ann Arbor. Karen Hendrick, Executive Secretary of the Senate Fiscal Agency, prepared the report for publication.

Any questions regarding the contents of this report should be directed to Ellen Jeffries at the Senate Fiscal Agency, (517) 373-5300 or [ejeffries @senate.michigan.gov](mailto:ejeffries@senate.michigan.gov).

TABLE OF CONTENTS

Executive Summary	1
Section 1: Michigan Population Statistics	5
Section 2: County Reports	19
Section 3: University Reports	187
Section 4: All Michigan Public Universities	263
Section 5: International Enrollment.....	269

EXECUTIVE SUMMARY

This report is a compilation of student residency data collected and reported by each of the 15 public universities in Michigan which provides a comprehensive overview of enrollment patterns across the State and from throughout the world. Additionally, population data from the census bureau is used as a point of comparison for enrollment rates in each county. Whenever possible, 10-year averages are also shown as a baseline for comparison. However, due to missing data, some of the averages are for an eight- or nine-year period. Wherever data is omitted, the average has been adjusted to reflect the data available.

This report conducts a study of student residency based on the location of the student's domicile and does not reflect their tuition status with the universities. Several of the public universities have reciprocal agreements with other states that allow students to attend the university at in-state rates. These arrangements are not reflected in this study.

The report is arranged in five sections. The first section compiles population data for the State to provide background and potential explanations for the ebb and flow of enrollment in counties. Section 2 provides detailed enrollment on a county basis showing the number of students that attend each of the 15 public universities. Section 3 takes much of the same data from section 2 and includes information about out-of-state and foreign students and organizes the information by each university. Section 4 summarizes the data for the entire public university system. Finally, 10 countries were selected for review in section 5 based on their contribution of students to the university system and potential interest due to current geopolitical events.

Population

The State of Michigan experienced a 0.7% increase in population from 9.9 million in 2000 to 10.0 million in 2008 based on the U.S. Census Bureau estimates. This is slightly below the national population increase of 0.8% experienced over the same time period. As Table A shows, Wayne, Oakland, Macomb, Kent, and Genesee Counties were the top five most-populated counties in 2000 and continued to be so in 2008. Wayne and Genesee Counties maintained their rank in spite of experiencing population declines since 2000. Michigan's population is concentrated in the southern half of the State with especially dense concentration in the southeast quadrant around the Detroit metropolitan area, with an additional center of population concentration in Kent County on the west side of the State.

Of the 83 counties in Michigan, 36 counties experienced population gains, 37 counties experienced population declines, and 10 counties showed less than a 1.0% change in population from 2000 to 2008. As Table B indicates, Livingston County had the largest percentage increase of 16.3% since the 2000 Census and jumped in the rankings from the 15th to the 11th most-populated county. Ontonagon County experienced the largest decrease in population of 12.8% and maintained its rank of 81st most-populated county. Keweenaw County continues to be the least-populated county with only 2,202 residents.

Of the 15 counties in the Upper Peninsula, 13 experienced population declines; Mackinac and Ontonagon Counties both experienced double-digit population declines. Marquette and Chippewa were the two counties of growth, both experiencing increases of less than 1.5%.

Since the 2000 Census, the State of Michigan has grown older. The median age of the State rose from 35.5 in 2000 to 38.0 in the 2008 estimates. This is compared with a median age for the nation of 35.5 in 2000 and 36.8 in 2008. In spite of this aging population, the 18- to 24-year-old cohort grew within the State from 9.4% of the total population in 2000 to 9.7% in 2008 and is the cohort associated with undergraduate studies.

County Enrollment Rates

Michigan saw an increase in public university resident enrollment of 6.3% from 2000 to 2008. This is compared with a 7.6% increase in overall enrollment in all Michigan public universities. Table C lists Oakland, Wayne, Macomb, Kent, and Washtenaw as the top five counties for enrollment in both 2000 and 2008. This is not surprising considering their large populations and close proximity to large institutions.

As illustrated in Table D, 37 counties saw an increase in enrollment with Benzie, Kalamazoo, and Livingston Counties experiencing an increase of more than 30.0% in their enrollment. Forty-one counties experienced declines in enrollment including Keweenaw, Montmorency, and Presque Isle which all experienced a greater than 30.0% decline in enrollment. Finally, six counties had a change in enrollment of less than 1.0%.

Of the 37 counties that experienced population declines, 18 showed enrollment increases including Clinton, Grand Traverse, Lapeer, Macomb, and Benzie Counties which were all among the top 10 counties for enrollment gains. Benzie County had the largest increase of 42.2% in spite of a 2.4% population decline.

Seventeen counties experienced the opposite effect, showing enrollment declines in spite of population increases. This includes Luce County which saw a 23.5% decline in enrollment and a 16.3% increase in population. The Upper Peninsula, in spite of its population declines, had seven counties that experienced enrollment increases, and the two counties that had population increases actually experienced enrollment declines.

There are 13 counties that have a public university, with Wayne and Washtenaw Counties having two institutions each. Of these counties, seven experienced enrollment declines, including Genesee and Mecosta, which experienced declines in spite of population growth and proximity to an institution.

Nonresident Enrollment

Out-of-state enrollment increased by 17.8% from 2000 to 2008 with an additional 4,262 students attending in 2008. Illinois contributes the largest number of students at 4,867, with Ohio in a distant second place with 2,754 students. The number of students attending from Ohio has actually decreased over the past decade and is the only state among the top 10 contributors to do so. Surprisingly, in spite of its proximity to the State, Indiana is ninth on the list, with larger states such as California, New York, and Pennsylvania contributing a larger number of students. Texas showed the largest increase of students attending compared to 1999 and is now tenth among the states.

Foreign enrollment has experienced an increase of 11.8% since 2000 and includes students from 176 countries and territories. China surpassed India for the first time in 2008 to become the top contributor of students. Canada is the third largest contributor of students but has had a decline in the number of students enrolled since its peak year in 2001.

Michigan Population at a Glance

Table A: Top 5 Counties by Population

SECTION 1: MICHIGAN POPULATION STATISTICS

Summary

This section provides a basic overview of the population changes within the State by county since the 2000 Census, based on the 2008 U.S. Census Population Estimates as of July 1, 2008. All enrollment data is obtained from the Higher Education Institutional Data Inventory (HEIDI) database.

Table 1.1, Map 1.1, and Map 1.2 give a comprehensive analysis of population by county in Michigan from the 2000 census and the 2008 community estimates.

Table 1.2, Map 1.3, and Map 1.4 show enrollment in public universities by county as reported from the HEIDI database. Some universities have students enrolled and classified as “Michigan Resident County Unknown”. These unclassified students mean that the rankings and numbers presented are estimates based on the best available data.

Table 1.3 data was provided by the Center for Educational Performance and Information (CEPI) and can give a baseline of the number of potential new students from high school in each county.

Table 1.4 contains data from the U.S. Census Bureau on the 18- to 24-year-old cohorts within each county at the time of the 2000 census and for the 2008 population estimates. The table compares the percentage of the population in a county in the most common college age group to the percentage of the county population that is actually enrolled in the public universities.

SECTION 2: COUNTY REPORTS

Summary

This section provides a detailed analysis of each county's population and enrollment. The population data is obtained from the U.S. Census Bureau and the enrollment data is from the HEIDI database. Population estimates are used for noncensus years based on survey data.

In each county subsection, Table A provides basic summary statistics for the past nine years including total county population, the percentage of Michigan population each county represents, and the percentage of the county enrolled in State universities.

Each county subsection also includes a Table B which shows a breakdown of student enrollment by university. Chart A is a pie chart depicting the 2008 breakdown of enrollment by university to easily ascertain the relative percentage of attendance at each of the public universities for the county.

Chart B in each county subsection provides an indexed view of the population change and enrollment change in each county. This is based on the 2000 population and enrollment and illustrates the percent change experienced in each year to provide an understanding of the potential role population growth or decline could play in enrollment rates in each county.

SECTION 3: UNIVERSITY REPORTS

Summary

This section provides detailed descriptions of enrollment patterns for each of the 15 public universities in Michigan for the past decade. All data is from the HEIDI geographical summary and does not reflect the tuition status of students. Several universities were missing data for 1999 including Ferris, Michigan State, University of Michigan-Dearborn, and Western. University of Michigan-Dearborn was also missing data for 2002. All averages have been adjusted to reflect this missing data.

Table A in each subsection is a summary of enrollment for the past decade including a breakdown of in-state, out-of-state, and foreign students and their percentages of the overall student populations of each university.

Tables B through D provide the Top 10 counties, countries, and states for enrollment for each university for 2008.

Table E provides a breakdown of foreign enrollment by region provided by HEIDI.

Table F provides a comprehensive breakdown of enrollment by county for each university. The 2008 enrollment is shown in Map A with the university plotted to show the relative concentration of students in proximity to the university.

A map of Michigan divided into its 83 counties. The counties are color-coded based on the number of students. Most counties are white (0 students). A large cluster of yellow counties (1-20 students) covers the Upper Peninsula and parts of the Lower Peninsula. A few green (21-64), teal (65-350), dark blue (351-1400), and navy blue (1401-5802) counties are located in the southeastern Lower Peninsula, near Detroit. A legend box in the bottom left corner provides the key for the colors.

Number of Students

White	0
Yellow	1 - 20
Green	21 - 64
Teal	65 - 350
Dark Blue	351 - 1400
Navy Blue	1401 - 5802

Map 3.15.A 2008 WMU Enrollment

SECTION 4: ALL MICHIGAN PUBLIC UNIVERSITIES

Summary

This section summarizes enrollment for the entire public university system and provides a detailed breakdown based on a variety of geographical groupings. All data is taken from the HEIDI database.

Table 4.1 is a breakdown of out-of-state enrollment by census region.

Table 4.2 provides the Top 10 states for enrollment in 2008 and 1999 and includes the percentage change for the decade.

Table 4.3 breaks down foreign enrollment by geographic region and includes a comparison of the enrollment numbers, percentage of foreign enrollment, and percentage of total university enrollment for the decade.

Table 4.4 lists the Top 10 countries for enrollment for the past decade for comparison.

Table 4.1 Out-of-State Enrollment by Geographic Region All Michigan Public Universities Fall 2008				
Census Division	Section	Headcount	Out-of-State Enrollment	Percentage of Total University Enrollment
NORTHEAST REGION				
	NEW ENGLAND	1,383	5.0%	0.5%
