

THE U.S. AND MICHIGAN MOTOR VEHICLE STATISTICAL REPORT

September 2003

THE SENATE FISCAL AGENCY

The Senate Fiscal Agency is governed by a board of five members, including the majority and minority leaders of the Senate, the Chairperson of the Appropriations Committee of the Senate, and two other members of the Appropriations Committee of the Senate appointed by the Chairperson of the Appropriations Committee with the concurrence of the Majority Leader of the Senate, one from the minority party.

The purpose of the Agency, as defined by statute, is to be of service to the Senate Appropriations Committee and other members of the Senate. In accordance with this charge the Agency strives to achieve the following objectives:

1. To provide technical, analytical, and preparatory support for all appropriations bills.
2. To provide written analyses of all Senate bills, House bills and Administrative Rules considered by the Senate.
3. To review and evaluate proposed and existing State programs and services.
4. To provide economic and revenue analysis and forecasting.
5. To review and evaluate the impact of Federal budget decisions on the State.
6. To review and evaluate State issuance of long-term and short-term debt.
7. To review and evaluate the State's compliance with constitutional and statutory fiscal requirements.
8. To prepare special reports on fiscal issues as they arise and at the request of members of the Senate.

The Agency is located on the 8th floor of the Victor Office Center. The Agency is an equal opportunity employer.

Gary S. Olson, Director
Senate Fiscal Agency

ACKNOWLEDGMENTS

David Zin, Senate Fiscal Agency (SFA) Economist, compiled the data contained in this report, and the many tables and charts were prepared by Karen Hendrick. Special thanks are extended to Andrew Lockwood of the Office of Revenue and Tax Analysis, Michigan Department of Treasury, for his assistance. Any questions concerning this report should be directed to David Zin or Jay Wortley, SFA Senior Economist, at (517) 373-2768.

THE U.S. AND MICHIGAN MOTOR VEHICLE STATISTICAL REPORT

This marks the fifth edition of the U.S. and Michigan Motor Vehicle Statistical Report. The purpose of this report is to provide an ongoing source for both historical and up-to-date annual data on the motor vehicle industry.

The motor vehicle industry continues to play a very significant role in Michigan's economy. In 2002, almost one out of every 16 workers in Michigan was directly employed in the motor vehicle and equipment industry. The motor vehicle industry was even more dominant in terms of the income generated in Michigan. In 2001, the relatively high-paying motor vehicle jobs accounted for \$1 out of every \$9 earned by all workers in Michigan. Michigan's motor vehicle industry also dominates in terms of the total U.S. motor vehicle industry. Michigan produces about one-fourth of the motor vehicles produced in the U.S., and General Motors, Ford, and Chrysler all have their headquarters in Michigan. Given the relatively large size of Michigan's motor vehicle industry, in terms of both the Michigan economy and the national motor vehicle industry, changes in the level of motor vehicle sales nationally, particularly sales of domestically built vehicles, have significant impacts on Michigan.

Some of the dramatic and significant changes that have occurred during the past 20 to 25 years include:

- The import share of U.S. auto sales increased from 19% in 1975 to a high of 31% in 1987.
- The rising share of imports was reversed in the late 1980s and early 1990s as more foreign auto companies began producing autos in the U.S. In 1985, foreign companies accounted for only 3% of the motor vehicles produced in the U.S. By 2001, this percentage share had increased to 26%.
- Consumers are making a dramatic and steady shift away from autos to trucks. In the early to mid-1970s, autos accounted for about 80% of total U.S. motor vehicle sales, but by 2001 light truck sales comprised the majority of sales. In 2002, light trucks accounted for 52% of total U.S. motor vehicle sales.
- The median age of autos in use rose from 4.9 years in 1970 to 8.3 years in 2000.
- Leasing has become a popular way to purchase an auto. In the early 1970s, virtually no leasing was done, but by 1999, 34% of new cars were leased. In recent years leasing has declined in popularity, comprising 23% of sales in 2002.
- Michigan's share of total U.S. light vehicle production peaked at 35% in 1983. In 2002, Michigan accounted for 24% of total U.S. output of light vehicle and 36% of all automobile production.
- Michigan's motor vehicle and equipment industry accounted for 11% of total wage and salary employment in Michigan in 1978, but that share had fallen to 6% by 2002. This decline was due to increased productivity and the motor vehicle manufacturers' increasing use of purchasing components and parts from other companies.

These and other trends are highlighted in the data contained in this report.
